

Author Guidelines

Pharm.D Vault Organization

These guidelines explain how to prepare and submit manuscripts to Pharm.D Vault Organization. Authors should read every requirement and complete the submission checklist before sending a manuscript.

Scope and Article Types

Pharm.D Vault Organization welcomes pharmacy, clinical pharmacy, pharmacology, pharmaceutical science, patient safety, medication management, and healthcare research. Article categories may include original research, reviews, case reports, short communications, and editorials. Confirm current category availability with the editorial office before submission.

General Requirements

Manuscripts must be original, written in clear English, and submitted only to Pharm.D Vault Organization while under review. All listed authors must meet authorship criteria, approve the final manuscript, and accept responsibility for the work.

Manuscript Structure

Use the official manuscript template. Include a title page, abstract, keywords, main text, acknowledgements, funding statement, conflict of interest declaration, ethics statement where applicable, references, tables, and figure legends.

Ethics and Consent

Research involving human participants, patient data, or animals must include a clear ethics statement. Remove personal identifiers from case reports and obtain written patient consent when required. Attach ethical approval documentation when requested.

References and Figures

Use a consistent reference style and verify all citations. Number tables and figures consecutively, give each a descriptive title or legend, and obtain permission for reused material.

Submission Package

Submit the manuscript file, cover letter, conflict of interest declarations, ethical approval declaration where applicable, copyright transfer agreement after acceptance, and supporting files or figures.

Peer Review and Decisions

Submissions undergo editorial screening and peer review. Authors may be asked to revise the manuscript. Publication decisions are based on scope, quality, originality, ethics, clarity, and reviewer feedback.

Publication Ethics

Plagiarism, duplicate submission, data fabrication, image manipulation, undisclosed conflicts, and inappropriate authorship are not acceptable. Concerns will be managed according to the organization publication-ethics process.

Submission Checklist

- Manuscript follows the required structure.
- All authors have approved the final version.
- Ethics and consent statements are included where needed.
- References, tables, figures, and permissions are complete.
- Cover letter and required declarations are attached.
